Dear Dr Parker,

WELCOME TO OUR

PADCEV Pulse Newsletter

At Pfizer, we recognize that as a dedicated healthcare professional, it's essential to stay informed about the latest developments and innovations in the management and treatment of urothelial carcinoma.

RESOURCE ALERT

We are pleased to share a new educational video on the significance of antibody–drug conjugates (ADCs) in urothelial carcinoma treatment:

Understanding the Science

ADCs & PADCEV® (enfortumab vedotin-ejfv)

Learn about how ADCs deliver cytotoxic agents directly to tumor cells by targeting Nectin-4, a protein highly expressed in urothelial carcinoma. This resource illustrates how PADCEV's targeted mechanism supports treatment of locally advanced or metastatic urothelial carcinoma.

CLICK HERE TO WATCH THE VIDEO
